## Web Developer

## Experience

### October 2022 - June 2023

Univeye I.K.E I Science & Technology Park of Epirus S.A. Ioannina

#### Junior Web Developer

After the completion of my internship, my employer proceeded with my hiring which led to more responsibilities:

- Developing company projects from scratch that will be introduced to the Municipality of Ioannina.
- Developing internal company projects using Yii2 framework (Both Front-end and Back-end).
- Redesigning ideas into Desktop apps using React as the Front-end and the Tauri framework for the desktop transformation. ( Installers for Linux and Windows systems).
- Supportive role in Developing European Projects such as the IDEAN E-learning Platform. (Moodle based, expanded with extra functionalities to meet the project needs).

### April - September 2022

Univeye I.K.E I Science & Technology Park of Epirus S.A. Ioannina

#### Junior Web Developer (Internship)

Some responsibilities that i faced during my internship were:

- Recording and analyzing measurements through RESTful APIs.
- Introduction and in-depth experience in creating suitable interfaces (front-end development).
- Redesigning old company projects with a more modern look.
- Transforming web apps into desktop applications with the ElectronJS framework.
- Introduced to backend development using the Yii2 MVC framework.

## Soft-skills

Teamplayer, hardworking, passionate about technology and development, easygoing, proactive and loyal.
